

Revolutionizing Indoor Wireless Connectivity With Airvine

WaveTunnel™

WaveCore™

Prepare for Tomorrow, Today.

Powered by our patented **WaveTunnel™** and **WaveCore™** technologies, we provide a robust, high-speed backbone for all your wired devices, wirelessly.

Airvine delivers a revolutionary approach to in-building networking, eliminating the need for extensive Cat5/6e or fiber optic cabling.

Tired of Cable Clutter and Construction Hassles?

Airvine is the answer. We are the innovators of cutting-edge indoor wireless connectivity solutions that provide a completely wireless Ethernet backbone for all types of commercial buildings - from multi-dwelling units (MDUs) to sprawling industrial complexes. Say goodbye to disruptive installations and hello to pervasive, gigabit connectivity.

What is Airvine?

Airvine delivers a revolutionary approach to in-building networking, eliminating the need for extensive Cat5/6e or fiber optic cabling. Powered by our patented **WaveTunnel™** and **WaveCore™** technologies, we provide a robust, high-speed backbone for all your wired devices, wirelessly.

Why Choose Airvine?

Airvine delivers a revolutionary approach to in-building networking, eliminating the need for extensive Cat5/6e or fiber optic cabling. Powered by our patented **WaveTunnel™** and **WaveCore™** technologies, we provide a robust, high-speed backbone for all your wired devices, wirelessly.

Cable Replacement Alternative

A superior alternative to traditional Cat5/6e or fiber optic cable, especially ideal for challenging environments such as

- | | | | |
|--|--|--|--|
| <p>01
Hospitals
Maintain sterile environments and minimize disruption.</p> | <p>02
Historic Buildings
Preserve architectural integrity with no core drilling or risers.</p> | <p>03
Higher Education Facilities
Rapidly deploy or upgrade campus networks.</p> | <p>04
Hotels
Seamlessly provide high-speed internet to every guest room.</p> |
|--|--|--|--|

Retrofitting Infrastructure Made Simple

Install in days, not weeks or months!

Less Labor = Less Cost

Significantly reduce installation time and associated expenses.

Minimal Disruption

No more noisy construction or invasive core drilling, ensuring property integrity and resident comfort.

Temporary Network Solution

Can quickly establish a functional network until permanent cabling infrastructure is deployed, offering immediate connectivity.

Airvine: Any Building, Any Wall, Anywhere.

- ✓ DRASTIC COST REDUCTION
- ✓ NO CORE DRILLING
- ✓ NO RISERS
- ✓ NO CABLE

Airvine: Powering Your Digital Future
Providing a backbone for:

Access Points (APs)

Cameras

IoT Devices

Anything w/ an Ethernet Port!

Ready to Experience the Freedom of a Truly Wireless Backbone?

Let us show you how we can transform your building's connectivity, cut costs, and accelerate your projects.
